Prasanth Arumugam

Senior DevOps Engineer

Cranberry Township, PA · +1 412-519-4804 · prasanth956607@gmail.com · linkedin.com/in/prasanth-arumugam-54265b180 · prasanth-portfolio.pages.dev

PROFESSIONAL SUMMARY

Senior DevOps Engineer with **7 years** of experience architecting, automating, and operating cloud-native platforms. Led the GitOps transformation of a **150+ microservice** estate on Google Kubernetes Engine - from hand-written manifests to standardized Helm charts to ArgoCD-driven deployments. Deep expertise across the CI/CD landscape (Azure DevOps, Jenkins, GitLab CI, GitHub Actions, Bamboo), infrastructure automation with Terraform and Ansible, and production operations across GCP, AWS, and Azure. I own release management end to end, embed quality gates into every pipeline, and build observability that lets teams ship fast without breaking things.

TECHNICAL SKILLS

Cloud Platforms: Google Cloud Platform (GKE, Cloud Run, Stackdriver), Amazon Web Services (EC2), Microsoft Azure

Containers & Orchestration: Kubernetes, Docker, Helm, ArgoCD, Argo Operators

Infrastructure as Code: Terraform, Ansible

CI/CD: Jenkins, Azure DevOps, GitLab CI, GitHub Actions, Bamboo

Monitoring & Observability: Grafana, Prometheus, Loki, New Relic, Elasticsearch, Filebeat, Splunk

Version Control & Collaboration: Git, GitHub, Bitbucket, TFS, Atlassian Jira

Scripting & OS: Bash / UNIX Shell, PowerShell, Red Hat Enterprise Linux (RHEL)

Quality & Testing: SonarQube, JUnit

Databases: RDBMS, SQL, PL/SQL

Practices: GitOps, Release Management, Agile / Scrum, DevOps Principles, Performance Optimization, Technical Documentation

PROFESSIONAL EXPERIENCE

Scrunch Works | Senior DevOps Engineer (progressed from DevOps Engineer) | May 2019 - Present

DevOps engineering leadership across enterprise client engagements and internal platforms.

American Eagle Outfitters | Client Project | May 2019 - Present

- Led the platform evolution of **150+ microservices** on Google Kubernetes Engine, architecting the migration from hand-written Kubernetes manifests to standardized Helm charts and then to ArgoCD-driven GitOps deployments.
- Architected infrastructure automation with Terraform and Ansible, codifying provisioning, patching, and configuration management across GKE and on-premise estates.
- Built and owned Bamboo CI/CD pipelines deploying to GKE, and Bamboo + Ansible pipelines for on-premise targets, containerizing workloads with Docker and Kubernetes.
- Established the release management process with engineering teams and owned release and hotfix deployments via ArgoCD.

PROFESSIONAL EXPERIENCE

American Eagle Outfitters | Client Project (continued) | May 2019 - Present

- Hardened delivery quality by integrating SonarQube static analysis and unit-test verification gates into pipelines.
- Designed the observability stack - Grafana with Prometheus and Loki, Filebeat, and the ELK stack - for monitoring, alerting, troubleshooting, and autoscaling production services.
- Drove continuous improvement through Agile ceremonies, evaluating and adopting new technologies to raise system reliability, scalability, and developer velocity.

Researgence CI-INT | Internal Platform, Senior DevOps Engineer | Mar 2023 - Jan 2024

- Designed and implemented end-to-end CI/CD pipelines on Azure DevOps, fully automating build, test, and deployment.
- Deployed and managed EC2 instances on AWS for application hosting and environment setup.
- Containerized applications with Docker and Kubernetes and automated YAML-driven deployments.
- Owned production monitoring, maintenance, and release/hotfix deployments.
- Embedded JUnit test cases and SonarQube quality gates into the pipeline, shifting quality left.

Kirya Docs | Client Project, Senior DevOps Engineer | Jun 2024 - Sep 2024

- Designed and implemented GitLab CI pipelines automating the full build and deployment process.
- Deployed and operated containerized workloads on Google Kubernetes Engine using Helm charts.
- Owned release and hotfix deployments with continuous service monitoring.

Pothigai | Client Project, Senior DevOps Engineer | Dec 2019 - Sep 2024

- Architected Jenkins-based CI/CD pipelines automating build and deployment processes.
- Governed GitHub repositories and branching workflows, enabling seamless collaboration and version control.
- Owned release management end to end, including hotfix deployments and continuous monitoring of services.
- Migrated version control from TFS to Bitbucket, automating the transition with PowerShell.

CERTIFICATIONS & AWARDS

Certification: Google Cloud Certified - Associate Cloud Engineer

Award: Contractor of Achievement - American Eagle Outfitters

EDUCATION

Vels University - Bachelor of Computer Applications (BCA) | 2016 - 2019
