EDUCATION

Vels University
2016 - 2019
Bachelor of Computer Application

EXPERIENCE

SCRUNCH WORKS
2019 - 2026
DEVOPS ENGINEER

AWARDS & CERTIFICATIONS

- Associate Cloud Engineer - GCP
- Contractor of Achievement at AE
- Top Sales Agent Award 2016

PROFILE

DevOps Engineer with 6+ years of experience in designing, automating, and optimizing cloud and on-premise infrastructure. Proven expertise in building and deploying 150+ microservices on GKE using Kubernetes and Helm, with successful migration to ArgoCD for GitOps-based deployments.

Strong hands-on experience in CI/CD pipeline implementation using Azure DevOps, Bamboo, Jenkins, and GitLab CI. Skilled in infrastructure automation using Terraform and Ansible, containerization using Docker, and orchestration with Kubernetes. Experienced in managing cloud environments across GCP and AWS, including GKE and EC2.

Passionate about continuous improvement, automation, and adopting new technologies to enhance system reliability, scalability, and performance.

WORK EXPERIENCE

SCRUNCH WORKS

DEVOPS ENGINEER

AMERICAN EAGlE OUTFIT

May 2019 - Present

- Automated infrastructure provisioning, patching, and configuration management using **Terraform**, **Ansible**, **Bamboo**, and **Jenkins**.
- Deploying applications to GKE(Google Kubernetes Engine) through bamboo pipeline Deploying application to On-prem servers through, Bamboo and ansible Learning new technologies based on project requirement.
- Deployed containerized applications to GKE and onprem servers using Docker, Kubernetes, Helm, and Ansible.
- Helping engineering teams to implement release management process Deployment Via **ArgoCD**
- Integrated SonarQube and verification tools for static code analysis and unit testing.
- Implemented monitoring, observability, troubleshooting, and scaling using **Grafana**.

SKILLS

- Docker, Kubernetes, Cloud Run
- Ansible, Bamboo, helmchart
- Argocd, Operators, jenkins, Gitlab CI, Github Actions
- Newrelic, Grafana, Filebeat, Prometheus, loki, Elastic Search, Splunk, GCP Monitoring StackDriver
- Performance Evaluation and Optimization
- Software Documentation Control
- Google cloud platform
- Azure Cloud & Azure DevOps
- Red Hat Enterprise Linux
- Software Components and Libraries
- Version Control Systems - git,TFS
- RDMS Development, SQL & PLSQL
- Atlassian JIRA, BAMBOO, BITBUCKET
- DevOps Principles
- Jenkins CI & Azure DevOps
- UNIX Shell Scripting
- Continuous Integration Systems
- Agile Work Processes

- I built more than 150 services from scratch and deployed them in the GKE. We deployed the service in gke for K8 manifest using the **helm chart**. later we Migrated to argocd
- Supported release management and collaborated in Agile ceremonies (stand-ups, sprint planning/reviews).
- Migrated TFS to Bitbucket using PowerShell; strong hands-on with **Linux**, **bash, Terrform Ansible** Helping engineering teams to implement release management process
- Integrated SonarQube and verification tools for static code analysis and unit testing.
- Implemented monitoring, observability, troubleshooting, and scaling using Grafana.

SENIOR DEVOPS ENGINEER

RESEARGENCE CI-INT - SCRUNCH WORKS

Mar 2023 - Jan 2024

- Designed and implemented CI/CD pipelines using **AzureDevOps**, automating the build and deployment process.
- Worked with AWS to deploy and manage EC2 instances for application hosting and environment setup.
- Worked with **Docker and Kubernetes** to containerize yaml applications and automate deployment.
- Monitoring and Maintaining the services.
- Release and Hotfix deployments.
- Pipeline has been along the **Junit** test case and **Sonaqube.**

SENIOR DEVOPS ENGINEER

KIRYA DOCS - SCRUNCH WORKS

JUN 2024 - SEP 2024

- Designed and implemented CI/CD pipelines using **GITLAB CI**, automating the build and deployment process.
- Worked with GCP to deploy Using **Helm Chart** and manage GKE **Kubernetes** for application hosting and environment setup.
- Release and Hotfix deployments.

SENIOR DEVOPS ENGINEER

POTHIGAI - SCRUNCH WORKS

DEC 2019 - SEP 2024

- Designed and implemented CI/CD pipelines using **Jenkins**, automating build and deployment processes.
- Managed source code repositories and workflows using **GitHub**, ensuring seamless collaboration and version control.
- Handled release management, including hotfix deployments and continuous monitoring of services
